Immediate Joiner | Open to Relocation

## Professional Summary

Junior Developer with professional experience building full-stack ERP applications using React.js, TypeScript, Redux, Redux Saga, NestJS, REST APIs, and MongoDB. Developed and integrated ERP modules end-to-end across frontend interfaces, backend services, database schemas, and business workflows, including Sales Shipment, Sales Return, Audit Trail, Stock Restructuring, and Transit Management. Hands-on experience implementing inventory workflows, authentication and authorization, REST API development, database operations, and complex business logic.

## Technical Skills

**Programming Languages** : JavaScript • TypeScript

**Frontend** : React.js • HTML5 / CSS3 • Redux • Redux Saga • MUI

**Backend** : NestJS • REST APIs • JWT Authentication

**Database** : MongoDB • Mongoose • MySQL / PL/SQL

**Tools** : Axios • Git / GitHub • Postman

**Additional** : Java • Python • Zoho CRM / Deluge

**Spoken Languages:**Tamil (Native) • English (Professional) • Hindi (Conversational)

## Professional Experience

### Junior Developer

#### GWAYERP Tech Solutions

Dec 2024 - Oct 2025 • Chennai, India

- Independently developed multiple ERP modules end-to-end using React, TypeScript, Redux, Redux Saga, NestJS, and REST APIs, including Sales Shipment, Services, and Sales Return
- Implemented Sales Shipment workflows with partial-shipment validation against Sales Orders, preventing excess shipments while updating warehouse physical stock and committed stock
- Re-engineered the inventory implementation by restructuring stock into Physical Stock, Quantity on Hand, Committed Stock, and Transit Quantity; modified MongoDB schemas and backend services and updated dependent ERP modules to support the new structure
- Engineered an end-to-end Audit Trail with React pages, Redux Saga workflows, NestJS services, and MongoDB schemas, including filtering by user, module, and date and tracking the module and user responsible for each modification
- Developed a reusable TypeScript utility for field-level change detection by comparing existing database records with incoming updates and capturing changed fields along with their old and new values while excluding configurable metadata fields
- Developed a dedicated Transit module for maintaining product movement between warehouses and contributed to Purchase Receipt and Goods Receipt development and stock-related integration across dependent ERP modules

### Zoho Developer Intern

#### Elite Tech Park

Mar 2024 - Jul 2024 • Coimbatore, India

- Automated manual data entry and lead qualification processes using Zoho CRM and Deluge scripting
- Implemented custom business logic to streamline CRM workflows, reducing manual intervention and improving efficiency
- Designed and deployed business process automation solutions using Zoho Creator and CRM tools
- Collaborated with senior developers to optimize existing automation workflows

## Freelance Web Developer

### Freelance

#### Independent Projects•Remote

- Developed web applications for college students, handling frontend, backend, database implementation, local hosting, and application setup
- Troubleshoot and resolved frontend, backend, and database issues across multiple concurrent projects
- Adapted existing full-stack development experience and reusable implementation patterns to deliver application requirements for different student projects
- Provided technical guidance on application functionality, debugging, database and API concepts, and project implementation when required

## Projects

---

### ERP & HRMS Management System Personal

React.js • TypeScript • Redux • Redux Saga • NestJS • REST APIs • MongoDB • Mongoose • JWT • Axios • MUI

Independently developing a modular full-stack ERP and HRMS application with employee, product, customer, order, leave, attendance, payroll, team, and role-based permission management. Implemented authentication, authorization, validation, dynamic order statuses and leave types, reusable frontend components, and standardized list, detail, and form views with sorting and pagination.

---

## Education

---

### B.Tech Information Technology

Karpagam Institute of Technology

2020 - 2024 • Coimbatore, India • CGPA: 7.49 / 10

**Relevant Coursework:** Data Structures & Algorithms • Web Development • Database Management Systems

## Certifications

---

### MongoDB Essentials - A Complete MongoDB Guide

Infosys • November 17, 2022

### Node.js

Infosys • November 15, 2022

### Data Science with Python

FITA • April 2026

## Core Competencies

---

**Professional Skills:** Problem Solving • Logical Thinking • Technical Communication • Team Collaboration • Agile Development
